DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF AURORA, TO THE VISIONARY SISTER LUCÍA DE JESÚS???

Renew your consecration to God every day and enter into the eternal movement of universal cycles.

Renew yourselves before the Creator so that He will conduct you through new inner paths and you will never remain in the steps you have already taken.

Recognize the infinite before you, and how much you need to grow far beyond this life. Recognize in the vast universe the infinite dimensions created and that each one of them will charge from you a certain learning that will make you grow and unite yourself each day more to God.

Child, what humanity calls contemplation and union with God, in this material dimension, is nothing more than an approach to the greatness of the Creator, an experience with His Divine Light. Contemplation is an act of recognizing the existence of God and of approaching Him, but much is still missing from the human heart and consciousness for it to be One with God in its origin.

This path is built and walked little by little. As the being empties himself from himself and from all the need to explain and to understand what he experiences, as he empties himself from the known concepts by his mind, he starts being permeated by other laws and vibrations that do not belong to this world and that are palpable to the human heart, but not understandable for the mind.

The approach and acceptance of these sublime laws gradually cause the doors to other degrees of evolution to open before the consciousness, and it will be only after crossing these doors and experiencing these laws that you will be able to feel and understand them, but not explain them.

You cannot explain what you live on higher levels because the matter that composes the human mind does not correspond to this subtle vibration; but yes, child, the heart, that is similar to the Creator of all things, can understand and live all laws.

Just as the Lord is unlimited in His Existence, so is also the heart of human beings. But this heart needs to expand, cross portals and break barriers, transcend limits and human tendencies, stop being so closed, and open itself to the Cosmos - that, for it, is inexplicable and understandable at the same time.

To reach this state of union with the higher life, that is more than a contemplative experience, child, it is necessary that you renew yourself every day and, when you perceive that you are stagnated or going backwards, always search for a form to awake and advance.

Therefore I come to the world, to impel the human heart towards the infinite, and to lead it to an experience of what it truly is.

Let yourself be guided and impelled by these words. If you do not understand them, only feel them and let them by themselves -alive as they are- work within you.

Your Father and Companion,

The Most Chaste Saint Joseph
