DAILY MESSAGE OF CHRIST JESUS, TRANSMITTED TO THE VISIONARY FRIAR ELÍAS

Silence and mercy will allow you to discover in which point your consciousness finds itself. The true act of silence consists not only in not talking but it also includes the thoughts and the feelings.

The world became habituated to talking permanently and its own noises now touch the deeper levels of consciousness, generating a lack of contact with God the Creator.

By means of the Chaplet of the Divine Mercy you will be able to elevate your hearts up to the state of silence of My Sacred Heart. See that, in order for Me to appear day by day to transmit to you My Message of instruction, My Consciousness emerges through the harmony of silence. If the consciousnesses that are upon the surface of the planet practiced this sacrament of silence, many internal and external situations of the world would be balanced in unison with the flowing of prayer.

To live in the silence and to experience it as a true source of inner communication between souls, the human being must love silence. The evolution of a soul will not advance if it only looks for silence. The consciousness must want to actually be in silence so that the effect of this immaterial source may act in all of the levels of the being.

Dears, you will encounter God in the silence of a prayer but in this time the word of the prayer also must be pronounced so that the souls may be able to be elevated up to the regency of other laws.

For this try to be and to live in the silence because in this way your soul will always show you the moment of changing and that which must be transformed. If the world in its majority made silence for just a day, the path of humanity would already be other.

For this God sustains His Will and accomplishes It in the silent hearts. It is possible to begin to live in the silence whenever the heart is willing to live it based on prayer.

Under the Light of the Father, be blessed.

Thank you for guarding My words in the heart!

Christ Jesus.
