DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED AT THE MARIAN CENTER OF FIGUEIRA, MINAS GERAIS, BRAZIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

Trees and life II

When the Lord created the planet and manifested it through His purest Thought of Love for life, He put into each detail of Creation a deep spiritual science in which everything that lives and inhabits the Earth contributes towards the renewal of Love and towards the return to the Heart of God.

The duality, chaos and evil created by humankind are fruits of the deviation of the human consciousness from the Heart of God. Through their choices, beings choose to be in God and discover, in communion with Creation, the path of return to His Heart, or they choose to remain in the illusion and entanglements of human limitations.

The Creator allows certain things to exist in order to guide humanity towards overcoming and the mastery of oneself and not towards the abysses of the world, through which souls enter every day.

Nature is still a mystery to be unveiled by the human consciousness, and that will not happen through their limited science, but rather, through their heart that is capable of entering the divine science and understanding it through the simple presence of the Spirit of God.

Trees, children, are the bond that keeps the Earth united to Heaven and do not allow the human consciousness to totally separate from God. In spite of human actions, wars and indifference, trees silently penetrate with their physical roots, into the depths of the Earth and, with their spiritual roots, reach the center of the planet, maintaining the union between life on the surface and the essence of the Earth.

With their treetops, trunks, branches, leaves and physical flowers, trees maintain the path of elevation to the Heart of God. And with their spiritual treetops, they reach the Heavens and nourish themselves in the Sublime Sources so that, by transforming the air that life breathes on Earth, they may also bring the graces and the spiritual food that allows consciousnesses not to lose peace and the possibility to love.

Trees were born to serve and they love their service thus, children, despite being outraged so many times, they do not cease to grow, bloom and offer their fruits in this world.

Contemplate the donation of trees and, sending them your eternal gratitude, let your consciousnesses be guided to the essence of the Earth and to the highest of Heavens, remembering in this way the true reason for their existence.

Trees do not forget what they were created for. Through them, you should also start to remember.

Your Father and Friend,

The Most Chaste Saint Joseph
