DAILY MESSAGE OF THE GLORIFIED CHRIST JESUS, TRANSMITTED IN THE MARIAN CENTER OF AURORA, PAYSANDU, URUGUAY, TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN DE JESÚS

Series - Manifestation of Aurora - Part XII

Within the Light-Communities, especially in the island of salvation of Aurora, within its three areas, three specific bases of rescue should be set up in which residents, the consecrated and collaborators will go through a formation in first-aid and, in some cases, a technical deepening in nursing.

In the three areas, three houses or rooms should be built where there would be a consulting room, a clinic and all the equipment that a lifeguard should have available in the time of the rescue; this includes rescue ropes, a boat, special flashlights, safety belts, fire-fighting elements, tools for saving lives within water, etc. All of this equipment must be correctly ordered, as well as the three consulting rooms that will be built for use as emergency bases in the face of any situation.

These three rooms must have shifts which will be relieved each week by the residents, the consecrated and especially by the nursing technicians that will be trained. For this reason, members of the Figueira Community that specialize in the area of rescue, surveillance and nursing must have periodic rhythms within the Community of Aurora to be able to form and accompany the building of the three emergency bases or modules.

This preventative measure will assist everyone to become more prepared for taking care of any necessity. Within these modules, there must be medicines, nursing materials and emergency implements that are kept up to date monthly so that they comply with the norms of hygiene, safety, and quality.

Nothing must be done precariously or poorly; these bases will also serve as a support for the local and regional community, especially in the unpopulated areas where assistance is more scarce. I declare this as a necessity to construct the bases, as a priority, and it will move forward with the support of all members of the Light-Network.

Uruguay needs to improve its emergencies infrastructure and Aurora will be in this proposal. For this reason, the means will be sought for the residents, the consecrated and the collaborators to learn how to swim and protect themselves from possible fires, and to be knowledgeable about earthquakes, tsunamis, and unexpected large floods.

You know that the planet and the nations will be purified by the elements of nature and, for that, you must be properly trained and updated.

The doors of the Community of Aurora will be open to receive doctors and technicians in emergencies and this formation must be academically supported by the corresponding entities.

I thank you for keeping My Words in your heart!

Who blesses you,

Your Master, Christ Jesus
