DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF AURORA, PAYSANDU, URUGUAY, TO THE VISIONARY SISTER LUCÍA DE JESÚS

The time of this world goes by and, in the Universe, the Time of God is approaching.

The cycles are transformed, the laws are exchanged so that other laws will be the impulses received by life.

Within the beings, spirits scream, and those who realized strong commitments with God can no longer remain in their ignorance and in the common living of their days.

The rays that spiritually descend from the Heavens moves, within the souls, the need to awaken; moves within those already awakened, the need to mature; and moves in those who are mature, the need to deepen. Nothing will remain as it is.

The Time of God will bring restlessness to all beings because their cells will be changing vibration, their essences will approach their origin, their spirits will see in the horizon the possibility of returning to God. Everything will move you towards evolutionary life.

Listen to the voice of your hearts. Know how to respond to your souls and, before a divine call, always say "yes".

Your Father and Friend,

The Most Chaste Saint Joseph
