Daily Message of Saint Joseph transmitted in the city of Frankfurt, Germany, to the visionary Sister Lucía de Jesús

Welcome the Science of God that is revealed and allow it to settle within you. Do not try to understand it immediately, but rather feel it and experience it, little by little, until it transforms you and reveals itself.

Learn to know, by living. Learn to welcome, by loving. Learn to transform yourselves, by being companions of God, each day a little more, and not just His children.

Aspire to be the new in this world.

Aspire to experience the unknown.

Aspire to be precursors of a new time, manifested truths, a new experience for the entire Creation.

You have My blessing for this.

Your Father and Friend,

The Most Chaste Saint Joseph
