DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN WEED, SISKIYOU, CALIFÓRNIA, UNITED STATES, TO THE VISIONARY SISTER LUCÍA DE JESÚS

Place your heart at the disposal of God, at each new day. In silence, contemplate His Presence within you and in all things.

Child, seek to always go deeper into your union with the Creator. In your heart, let all the impulses and teachings that the Creator sent to humanity be synthesized, and, within you, may these paths become one: the narrow and deep path of union with God.

Feel the Creator within the air that you breathe, in the nature around you and in your human nature. Feel the Creator in the Universe upon you, in the infinite Cosmos and in your inner cosmos.

Allow the times to be united within your own heart. There you will find the revelation of the new and the remembrance of the eternal. There you will discover the story of your origin, the path to fulfill this Infinity and to return to the starting point, which is the very Heart of God.

When a being returns to the Creator after having fulfilled their mission, and they carry with them a particle of a new and infinite love, as did the Son of God, in the Heart of the Father, Creation begins to recreate Itself, a new infinity is designed, a new path begins.

Transcend that which is superficial and merely human. Child, part away from the confusion and the illusion of this world, and each day focus your consciousness on that which is eternal, so that when the Time of God comes to Earth, you may be able to recognize it, for It is alive within you and you live within it.

The truth begins to be revealed within you when you are able to perceive that which is hidden within you. So, when you open your eyes, you will see that which was hidden in all life.

The Most Chaste Saint Joseph
