DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF FIGUEIRA, MINAS GERAIS, BRAZIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

When nature becomes stirred, enter into prayer and seek unity with the deepest Spirit of the Earth, the silent Spirit of God that permeates life and supports the planet.

Find peace in its silence, in spite of all the noise of the elements on the surface of the world. Let the wind and the seas roar, the fire crackle and the earth move. Let your heart be always in the heart of the planet, in prayer, serving for the balance and for peace.

Learn to observe and hear nature, learn to see its signs in the elements, and know that when it becomes stirred, it is because its deep Spirit is in need of peace.

Everything in Creation is life. Every soul and every spirit is part of One God. From the heart of humankind to the depths of the Kingdoms of Nature, everything comes from God, and in Him everything finds unity.

For this reason, child, feel yourself to be a part of nature, feel that your prayer calms it, that your love brings it peace and that, when you are within God, all of life can be there, in the eternal Presence of the Creator.

For this reason, pray for life, for balance and peace within all that is life.

You have My blessing for this.

The Most Chaste Saint Joseph
