DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF FIGUEIRA, MINAS GERAIS, BRAZIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

Holy Saturday was marked by silence and emptiness, in heaven as on Earth. The Heart of the Creator and Word went silent, and God Himself withdrew in the depths of His Heart. There the power of the Resurrection of Christ was gestated, the wisdom of eternity, the rebirth and the renewal of Love.

It would no longer be through science that the universe would know eternity and the extension of life. The spiritual resurrection was something new, never experienced in all of God's creation; and even the sages and the archangels silently followed the movement of love that, in all dimensions, made the life of Christ resurface.

His Spirit, which had given all of Himself, touched the Father with His experience and returned to Earth so that He could renew His Love.

God followed, in deep silence, the Love that was born from His Son. Even the Creator Himself learned from His surrender and from His Resurrection.

By the perfect power of Love, His Soul, Spirit, Divinity and human and material Body lit up and rebuilt. Love was the air that circulated once again within His cells. The code of Christification gave life to His Blood, His physical and spiritual organs. Life regained its meaning.

The Love of Christ continued to expand beyond the material layers. His surrender continued growing and penetrating unknown dimensions, in the cosmos as well as in the most obscure dimensions of material life, that which we know as earthly hells.

Like a wave that goes in all directions of the sea of Creation, the Love of Christ traversed the universes and all the manifestations of life. At the same time that it touched all creatures, the very experience of Love made His Body become revived and renewed, in a new, imperishable life, an omnipresent and all-embracing life. A life that does not have its own dimension and that at the same time lives in all dimensions: eternal life, because it is life in God, in unity with the Creator.

Just as the Father is in all things, so is the Son. His Body could manifest itself in matter as well as in the supra-dimensions. And where there is no matter, not even colors and sounds, only the silent and invisible Existence, there is also the Son of God. Everything is united to His Love.

The Resurrection of Christ cannot be explained with words or with science, because it transcends all science, all understanding and all wisdom. The Creator Himself, on Holy Saturday, was renewed, and with Him, all of Creation.

Silence is the only explanation for what happened there. In silence, you can experience this Love that embraces everything. Fullness, omnipresence, life, everything was made new on Holy Saturday and manifested on Glory Sunday.

Meditate, feel and experience the codes of this divine experience.

Your Father and Friend,

The Most Chaste Saint Joseph
