DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE CITY OF MACHADO, MINAS GERAIS, BRAZIL, TO THE VISIONARY SISTER LUCÍA DE JESÚS

The Science, the mother of all sciences, is Divine Love.

Love renews, transforms and changes all laws, in all dimensions.

From the Love of God was born the expression of all manifested life, in this universe and in all others.

From the Love of God emerged His Spirit and His Son, Sources of new life that are the origin of all the rays, all sound and all colors that vibrate throughout the different schools of life.

From the Love of God were born the angels and the archangels, His emanations that multiply this divine Power for all beings and protect it within them, so they may always have the possibility of developing love within themselves.

From the Love of God emerged the essence of human beings, like a seed of a new source, a drop, that when multiplied, transforms into a new sea. This is the essence of humankind, this is what they carry within them: a potential renewal of all life, called love.

Seek this mystery within yourselves and let this small drop of God within you multiply, grow and, at its peak, become a new source of life.

Within you, children, there are to be found new cosmos, full of possibilities, in which all creatures can find a renewal. This is your mission as beings, as children of God: renew all things.

Love and you will see a new life emerge within you.

Love and you will see divine principles dawning within you.

Love and you will institute a new life on Earth because love changes the laws of the past that guided humanity, and it gives all beings the opportunity to begin again.

Love, discover and live the purpose of your existence.

You have My blessing for this.

Your Father and Friend,

The Most Chaste Saint Joseph
