Daily message of Mary, Rose of Peace, transmitted in the city of Dornes, Ferreira do Zererê, Santarém, Portugal, to the visionary Friar Elías del Sagrado Corazón

The art of learning to be prudent

In this end time and in this life, prudence must become a permanent art in the spiritual life. By acting with prudence, many situations generated by my Adversary, through the stimuli received by the consciousnesses, will be prevented from taking place.

To be prudent at this time will help to prevent the destiny of events, so that certain experiences arising from imprudence will be avoided.

Imprudence is the opposite of precision and rhythm. At this time, in which humanity is placed in parallel dimensions through its actions, the imprudence of the disciples of Christ can no longer be overlooked.

The consequences of imprudence lead to emotional and mental instability of the human consciousness, because this is how humanity faces unforeseen situations without preparation to overcome them.

For example, the wars as well as the hunger that are experienced in some nations at this moment, are not only due to lack of prudence, but also as a result of the choice that goes beyond the material plan of the planet.

Imprudence generates in the consciousness different levels of mistrust and, inevitably, strengthens disobedience to the Law of the Hierarchy, which generates a learning that is also unforeseen in its evolutionary destiny.

Children, it is very important that you learn, in this cycle, to be prudent with a certain level of consciousness, because the attitude of prudence will lead you to be always at peace.

Imprudence has awakened in humanity the dominion of the actions of life, as well as the destiny of the nations. Imprudence could be fatal, because an insignificant action impregnated by a personal or group impulse, as it happens in these times, could change the course of the Project that the Father has thought of, whether it has to do with a group of consciousnesses or with the whole planet.

Humanity in this era is based not only on indifference, but also on the complex states of imprudence leading to the development of unusual and unnecessary events.

At this acute and crucial time for humanity and the planet, the conscious acts of prudence will correct the excessive impulses to spontaneously carry out personal, group and heroic actions.

From now on, you must act as the Hierarchy does, measuring the timing of events and decisions with observation, neutrality and patience. The chain of imprudence must be cut by prudent acts of true spiritual beings in service to the Plan of God.

While there is still material time, take advantage, My children, to perceive and learn about true spiritual prudence, based on the Law of Obedience and on the Law of Hierarchy. In order that your consciousnesses may reach this purpose of spiritual prudence, you must strive every day to be more attentive to your own motivations, ideas and expectations, because the Plan of the Hierarchy at this time is treated with caution and with much discernment.

The task to be developed by the Celestial Hierarchy cannot be treated in an imprudent and superficial way. It is at this point that your consciousnesses and hearts must pay attention.

It is also not recommended, children, that your lives and consciousnesses in this serious cycle of humanity be imprudent, with impulsive and selfish expressions.

To be prudent in the foreseen Plan and with the Hierarchy will determine, at this end time, the ability to be able to remove from your minds any personal, group, regional or worldwide idea.

Imprudence is the second spiritual disease of Humanity. Therefore, children, it is time and it is the moment for you to grow, not only because of the impulses that prayer brings to the heart, but also because of a greater attention that you must have from now on. This will liberate you from being debtors of the Plan by acts of imprudence or negligence.

It is a major effort for the whole Spiritual Hierarchy of the Light to follow the reality of this planet. At this moment, It premeditates before making decisions. This is so, dear children, because we are in times of battles and of profound definitions; that is why I warn you with all the Love of My Heart of a Mother, so that each day you are less distracted, more silent and attentive to the final events that are approaching.

This attitude, of a true thinking being, that must be conscious of all that must be fulfilled for the Plan, will also help to dissolve the global hypnotism of human indifference, a situation that does not allow souls to perceive the planetary suffering that exists in each people, in each nation.

Ask with faith so that, every day, the Holy and Divine Spirit may help you to build the basis of a true and conscious spiritual prudence; thus you will be transforming the mental consciousness of the planet, which is quite altered and charged.

I join every praying Heart that opens itself to grow inwardly and without distraction.

I thank you for being prudent and attentive from the heart!

Who helps you extraordinarily,,

Your Mother Mary, Rose of Peace

Prudence: Quality or virtue that consists of acting with reflection and discernment to distinguish between good and bad, and thus avoid unnecessary dangers and damage.
