Daily Message of Mary, Rose of Peace and Mother of the Refugees, transmitted in the Marian Center of Aurora, Paysandu, Uruguay, to the visionary Friar Elías del Sagrado Corazón

My dear children,

The indifference in this humanity, reflected in the lack of service of one for another, is the cause for the abandonment of the poor, the marginalization of those who are imprisoned, the pain of those who are suppressed and abortion as a fashion in the mothers of the world in these times; and all of this is the cruel cause of wars.

For the world to have inner peace and deserve it, effort, sacrifice and renunciation of everything that was always believed to be right, must be very great before the Kingdom of God.

The Universe knows that not all will have the consciousness sufficiently awakened to perceive how urgent it is to change within the self. For this reason, dear children, the times for the purification of the planet, of the Kingdoms of Nature and of humanity will come.

The warning has already been given, and very few in this current world recognize that it is better to change in time than to change through deep pain, the road that humanity has always chosen.

What can be done to change in time?

Serve, give of yourselves, surrender, do not criticize, do not judge, do not be tiresome, do not lie to yourselves nor to others, do not transgress the basic laws of life, be generous, be patient, be loving with others, be peaceful and help with joy, as long as you are called to serve; in this way, you will perceive that you will not be wasting time on other things and that little by little, everything will be converted.

It is for this reason, My children, that the Universe promotes service through humanitarian missions so that all may perceive how much they have distanced themselves from serving their neighbor, and of being available every day for what may be necessary.

The humanitarian missions are a way of remembering the fundamental principle of the apostleship of Christ in these times. Humanitarian service heals the indifference that beings have to everything that surrounds them. Humanitarian service is a way of balancing the serious faults that humanity commits today.

I thank you for responding to My call!

Who heals you,

Your Mother Mary, Rose of Peace and Mother of the refugees
