**Daily Message of Mary, Rose of Peace and Mother of the refugees, transmitted in the locality of San Esteban, Córdoba, Argentina, to the visionary Friar Elías del Sagrado Corazón**

Dear children,

May the Divine Conception of My Original Purity be of spiritual help for those souls that aspire to reach God and be in His Fatherly Arms.

Service to humanity, dear children, detaches the incapacity to love from the consciousness, and holds the doors of the heart open to God.

Every day, when missionaries serve, they must bear in mind that they are doing so for the Plan of God, for the fulfillment of this highest Work for peace in the world.

It is My Original Purity, the Purity of God, that will help you find the eternal path of elevation and of love for the world.

Dear children, the service in Turkey has the inner intention of opening doors even further so that hearts, on some plane of consciousness, may reencounter God.

The gifts that favor peace, love and fraternity can become unforgettable for the souls that receive not only humanitarian help, but also the love from heart to heart.

My dear children, in these times I need you to learn to serve spiritually, seeking in this moment to fulfill the Purpose of the Creator in all of humanity.

The missionaries in Turkey, together with the humanitarian associations that take care of the refugees, established an ecumenical bond of service for peace, with no conditions and in favor of no one. This fraternal act of cooperation and charity demonstrates to the universe the possibility that the paths of service may expand even more and that other consciousnesses may be able to serve in order to forget themselves and put their attention on the needs of the other.

The Divinity is relieved by the voluntary work; this shows an open path for new opportunities. Service to others will take you to find inner purity.

I thank you for responding to My call!

Who leads you to eternal service,

Your Mother Mary, Rose of Peace and Mother of the refugees
