Daily Message of Mary, Rose of Peace, transmitted in the city of Fatima, Santarém, Portugal to the visionary Friar Elías del Sagrado Corazón

Today I emit My Divine Thought from the highest lakes in the Himalayas.

From the heights of these mountains, the sacred Condor bird flies over the spaces of the planet to place upon the lakes the new attributes that must be gestated in the consciousness of the humanity that is awaking.

On the highest peaks of the mountains and over the lakes, your Heavenly Mother prays, contemplates, and in silence decrees all the divine affirmations that in the coming times will help to concretize new principles of rehabilitation and healing in the souls of human beings, which up until now have never been received.

Through the lakes, on the heights of the Himalayas, your Heavenly Mother mobilizes your inner worlds so that prayerful souls, who become mirrors through prayer, inwardly capture the signs that come from the Divine Thought of Creation.

It is thus that the greater Universe tries to mirror, over the lakes, the impulses that will make of this humanity in transition a race of disciples of the Spiritual Hierarchy.

By capturing these impulses that come from the universe, the human consciousness that opens to awakening through knowledge will be able to receive that which it needs for taking new steps in love and in inner consecration.

From the heights of the lakes of the Himalayas, your Mother of prayer works tirelessly to balance the interior of the world and humanity.

I thank you for responding to My call!

Who blesses you,

Your Mother Mary, Rose of Peace
