DAILY MESSAGE OF MARY, ROSE OF PEACE, TRANSMITTED IN THE CITY OF FATIMA, PORTUGAL, TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN DE JESÚS

Beyond the Universes - Part II

Within spacetime we find various realities, according to how we contemplate the immensity of the Universe.

We know that the Universe is not only physical, but also internal and spiritual.

We know that beyond the physical there is a Principle that still has not reached its end, because this Principle is evolving and developing.

In all of this existence of the Material, Internal, and Spiritual Universe is God, Who is the great Manager of the Creation within the systems of life that we know, that is, of material, mental and spiritual life.

God is present and manifested in all that has been created. We depend on Him to be able to truly live the Principle that created us.

Even if there are non-believing creatures, and even though this happens in most cases, in some place within them, God, as the Father and Dweller of the life of the spirit, is at the great expectation that His children become aware that life is not only material and that we are not only born, grow and die.

The Creative Universe itself, which is God expressed in an infinity of Names and of cosmic manifestations, expects that, in His Superior Love, His children recognize someday, that they have come to life for a Purpose.

In the Material Universe, also called vast Cosmos, we find infinite forms to understand the Existence of God in all spaces and planes of consciousness.

But God, in His most pure Intelligence, held and protected Himself in a place where every creature could find Him, beyond everything that is external.

The Eternal Father, in His great Humility, has placed Himself within each creature so that His children could learn to find Him and to feel Him very close.

If the Celestial Father is within us it is because within each soul there is a universe created by God, so similar to the Universe that we can know.

But more than hundreds of Suns, stars, nebulae, galaxies and vast Universes, God thought, in His Mercy, that His children should know what is unknown and is well kept within the beings: the true and autonomous potential of being able to love and develop through the degrees of love.

Throughout the times, the different humanities lost the path and the feeling of loving in an unconditional way and before the race destroyed itself, the Father of Love and of Infinite Unity decided to present Himself and incarnate through His Divine Son so that, by means of His Sacrifice, the creatures could remember how they should love and how much they should love.

If within the Children of God is this Grace of developing and of expressing themselves through the virtue of love, why does evil still exist?

Because evil is the opposite of the love that creatures can feel, show and reflect.

Evil is the result of a disobedience that was lived by one of the main angels when it moved away from love, as the disobedience blinded him completely.

If within us dwells and vibrates a universe that is so similar to the one that exists above us, why are the creatures of God sometimes incapable to unite to the Great Existence?

When we truly love, the barriers and obstacles dissolve from the paths. Christ came to teach the way through which the creatures would attain true freedom.

Again, God revealed Himself to humanity, from very close, so that they could recognize and love Him.

In all the existing Universes, within the human beings, is the great potential of awakening and of growing through the degrees of love.

Love which the Eternal Father Himself placed within His children, allows us to be in perfect communion with Him and with the Universe.

The infinite and divine Love that can awaken in each human being has the capacity of forgiving and of transcending any error committed.

When the souls cannot forgive nor reconcile with themselves, nor with their fellow beings, it is because fear prevails instead of love, and thus the door is closed to Truth.

Love is one of the great spiritual and physical revelations that the Eternal Father sowed with all of His Intelligence in His creatures.

The hour has come to submerge in the inner universe to find the treasures that the Highest left manifested in His children since the origins; because if we are in the origins, we will know how to remember our principle, which is to be in eternal communion with the Greater Universe.

I thank you for responding to My call!

Who blesses you,

Your Mother Mary, Rose of Peace
