Daily Message of Mary, Rose of Peace, transmitted during the journey from Assisi to San Giovanni Rotondo, Italy, to the visionary Friar Elías del Sagrado Corazón

The power of faith is capable of conceiving in hearts high degrees of devotion and of trust in the Creator, because faith conceives a state of unity with the Supreme Source of Creation.

Faith is capable of drawing to itself a state of Grace that allows converting and redeeming all things. In this sense, faith goes hand in hand with the energy of Grace, because the two principles represent the possibility for the human being to achieve union with their inner universe every day.

Faith also is the bearer of the essence of love, because the spiritual foundation of faith is to be found in love and unity. In this way, faith, as an energy, permits the correction of corrupt states of consciousness and places the soul on the path of peacemaking, the good and the positive.

Faith allows the generation of a condition of upliftment of the consciousness and balances the lack of trust in Divine Will.

Faith is everything for planetary life, since faith, as an attribute, lifts up the human consciousness again.

I thank you for responding to My call!

Who blesses you,

Your Mother Mary, Rose of Peace
