**DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE CITY OF FRANKFURT, GERMANY,
TO THE VISIONARY SISTER LUCÍA DE JESÚS**

Search for the science of illumination within you, and know that it is nothing more than the living of the Purpose of human creation.

Illumination is the act of finding the Creator again within yourself and to discover the path and the doorway to Divine Consciousness within your own self.

By living union with God, you will understand His Presence in all things; you will know what the essence of life is, of learning on Earth, and the reason why each being inhabits it.

To illuminate the consciousness is to find the Creator and know yourself to be a part of Him and this, children, is achieved through experience, with the constant search to find God.

Sacred books will guide you; philosophies and true religions will help you find the path for this; but nothing has any meaning if each one of you does not search within yourself for the experience of unity with your Creator.

To pray is to seek the path of communication with God. To communicate with the Father is to create the link of your souls with Him so that you may be able to gradually enter into His Truth and receive the revelation of His Presence.

Seek for the Light of God so that He, in you, may illuminate the abysses of this world. The time has now come in which the little lamps must be on the table, and this is done, children, not with the light of humankind, but with the Light of God in human beings.

Your Father and Friend,

The Most Chaste Saint Joseph
