DAILY MESSAGE OF MARY, ROSE OF PEACE, TRANSMITTED IN THE MARIAN CENTER OF FIGUEIRA, TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN

The Communication Network of the Heavenly Mirrors, continuation

Open your heart and empty your mind in order to understand and live the mysteries of Creation.

In that opening you will be able to penetrate the essence of knowledge, and everything that is sacred in the Universe will reach you not only as information, but as codes of Light that awaken in your being to transfigure you.

This is the power of the Mirrors, heavenly generators of universal harmony that concentrate within themselves all the attributes of Creation.

We state and understand as attributes all the rays and celestial currents that the Creator Fathers used for the manifestation of the planes and of life.

It is thus that the Heavenly Mirrors hold within themselves the remembrance of our spiritual, mental, and material origin. It is these attributes that, from time to time, allow the renewal of universal life and all the cycles, bringing positive impulses that impregnate all of Creation.

In the beginning of the origin, what we would understand as the essence of the Divine Thought of God, the Source created the Archangels so that they could create the Hosts of Light in the Mental Universe; in this way, at the beginning of everything, the Mental Universe was gradually gestated by the existence of the first armies of the Elohim.

These resplendent Consciousnesses were given impulse to collaborate in the creation of the Material Universe, because in the Thought and in the Heart of the Eternal Father there existed the Will for great experiences of love to occur that would go beyond all previous ones.

In the beginning, at the request of God, the Creator Fathers created the Heavenly Mirrors, because in the Material and Mental Universe these would help in the spiritual evolution of all universal life.

The Heavenly Mirrors were also formed by twelve attributes, twelve Rays, or twelve currents of spiritual and divine energy that would allow the history of the origin of the Creation to be well-guarded and available as light-based information for all the consciousnesses that would be created in the image and likeness of God.

The twelve attributes that were expressed during the gestation of the Mental and Material Universes emanated directly from what we know as the Source of Creation, which is the pure, immaculate, and divine essence of the Eternal Father.

From that point, during twelve cycles or twelve time spans, the Mental and Material Universes that were in formation received these spiritual impulses in order that the building of evolutionary life on the different planes be completed.

The first attribute emanated from the Source was that of LIFE; in that moment, God decreed: "On all the planes may Life exist, which will be visible and invisible, but in essence full of Love."

The second attribute emanated from the Source was that of UNITY; in that moment, God decreed: "May all the Life that will manifest in My likeness know and live Unity in order to reach the Source through Love."

The third attribute that emanated from the Source was that of LOVE; in that moment, God decreed: "May Divine Love be known by all Life, and may Life express all the degrees of love so that evolution may progress."

The fourth attribute that emanated from the Source was that of KNOWLEDGE; in that moment, God decreed: "May Knowledge make all Life sacred, may spirits ennoble their consciousnesses through having knowledge of love and unity."

The fifth attribute that emanated from the Source was that of HUMILITY; in that moment, God decreed: "May all Creation be humble in spirit and constitution; may the true government and evolution be reached by the humble, and may all life imitate this sacred path."

The sixth attribute that emanated from the Source was that of COMPASSION; in that moment, God decreed: "May absolute Compassion arise in universal life so that consciousnesses remember that everything is based on Love and on Mercy".

In this way, the seventh attribute that emanated from the Source was that of MERCY; in that moment, God decreed: "May all Creation live Mercy in essence, and may this Law vivify whomever contemplates it in devotion".

The eighth attribute that emanated from the Source was that of POVERTY OF SPIRIT; in that moment, God decreed: "May true evolution take place in all the poor in spirit, so that nothing nor anybody will deviate them from the sacred path by means of any temptation".

The ninth attribute that emanated from the Source was that of SERVICE; and in that moment, God decreed: "May cooperation and mutual help establish the spirit of service in the Universes; may love and service interpenetrate all life so that fraternity may arise and be the basis of universal evolution".

The tenth attribute that emanated from the Source was that of PIETY; and in that moment, God decreed: "Happy are all consciousnesses that supplicate in My Holy Name, because I will have absolute Pity on each one of them and in this way they will know the power of the Mercy of My Heart".

The eleventh attribute that emanated from the Source was that of ETERNITY; and in that moment, God decreed: "May all that was created, after its experience, know Eternity; may all the planes that hold universal life elevate spirits so that they may merge into infinity and thus attain immortality".

The twelfth attribute that emanated from the Source was that of SCIENCE; and in that moment, God decreed: "May all Creation and life become aware of the Laws and may the Laws guide, lead, and realign all universal life under the spirit of harmony".

These twelve attributes were essentially kept inside the Heavenly Mirrors, which also radiate these creative principles to the whole Material Universe.

The Heavenly Mirrors are great states of divine consciousness present on three planes: the material, the mental, and the spiritual; in this way, a powerful equilibrium is established in the whole Universe, which is underpinned by angelic consciousnesses.

Thus, the communication network of the Mirrors helps in the redemption and the rehabilitation of all life in different cycles and times. It is in this way that the Heavenly Mirrors, counting on these divine impulses, become sources of the emanation of love and unity for all life.

The existence of the Heavenly Mirrors reminds planetary life that souls must always aspire to someday become similar to a Mirror, not because of its potency, but to be able to mirror what the Father expects of each creature, just as He thought it in the beginning.

I thank you for responding to My call!

Who is united to the Mirror of Light of each heart,

Your Mother Mary, Rose of Peace
