**DAILY MESSAGE OF SAINT JOSEPH, TRANSMITTED IN THE MARIAN CENTER OF AURORA, PAYSANDY, URUGUAY, TO THE VISIONARY SISTER LUCÍA DE JESÚS**

For peace to be a reality in the world, it must begin to exist in the hearts and lives of some men, however few that may be.

To be peaceful, you must learn to dissolve the obstacles that your own consciences place on the path of those who try to live in peace. And this can be achieved in two ways: in silence and in service.

Silence should be based on humility and have peace as its goal. Service should be based on fraternity, to reach the goal of peace.

The heart that is willing to silence reaches peace for itself and for others, avoids conflicts, disagreements and arguments encouraged by the enemy. The heart that is willing to serve, that takes to itself what no one wants to do and, willingly, brings peace to the daily life of its surroundings, without realizing it, is being a channel of God in the world, to dissolve distant conflicts and to placate the anger of many hearts that it does not know.

When you consecrated your lives to God, everything that you do with conscience and offering becomes a service to the entire humankind.

Now, I warn you: I do not ask you to be indifferent in your silence or your minds to criticize and judge while you do something that no one wanted to do. If there is no love and gratitude in your actions, you better be like most of ordinary humanity, because worse than not doing is doing without being truthful.

I bring you these instructions not so that you change your own lives, but that you change the planetary life, because you are living cells of the body of this planet. Therefore, everything that you do will reverberate throughout the planetary consciousness.

I love you and I thank you, already, for the response of all and the conscience that you will have turned to the fulfillment of the Plans of God.

Your Beloved Father, the Most Chaste Saint Joseph, guiding humanity in the simple things, so that one day you may reach the Kingdom of God
